

TIFFANY HSU

Goleta, CA | 562-889-8892 | thsu@ucsb.edu

EDUCATION

University of California, Santa Barbara

Expected December 2022

Bachelor of Science, Environmental Studies; Minor, Spatial Studies

GPA: 3.62

- **Relevant Coursework:** Chemistry, Biology, Waste Management, Introduction to Python (JupyterHub), Exploratory Water Data through R Programming, Machine Learning, Ethical Data Science

WORK EXPERIENCE

Conservation Economics Lab, Undergraduate Research Assistant

June 2021 - Present

- Digitize spatial and remote sensing data related to land use/land cover and agriculture, focusing specifically on monitoring palm oil supply chain change in Indonesia.
- Georeference and digitize land cover maps using ArcGIS Pro to map palm oil plantations in Indonesia.
- Retrieve Sentinel and Landsat satellite images from Google Earth Engine through command line for use in monitoring land use change in Chile.

Introduction to Data Science Course, Undergraduate Learning Assistant

March 2021 - Present

- Provided assistance to students by answering questions in class and holding office hours.
- Work with teaching staff to develop questions and exercises that introduce Python and data science concepts to non-programmers in a digestible manner.
- Designed cheatsheet style guide for learning the basic functions of Python from the datascience and NumPy modules to make their learning experience easier.

Analytical Lab, Lab Assistant

September 2021 - Present

- Dry, weigh, and load biological, synthetic, and geological samples into tin capsules or nickel sleeves.
- Acidify filters with HCl to remove inorganic carbonates.

Cheadle Center for Biodiversity and Ecological Restoration, Intern

July 2020 - August 2020

- Digitized and georeferenced specimens for use in the National Science Foundation.

Storke Ranch Vernal Pool Restoration, Santa Barbara, Intern

September 2019 - December 2019

- Aided in sensitive vernal pool ecosystem restoration by removing invasive plant species using weeding and solarization techniques and planting native species.
- Supervised campus volunteer groups in invasive plant identification, weeding, and planting techniques.

ACADEMIC PROJECTS

Data Science Capstone, 2021-2022 Cohort

September 2021 - Present

- Working in partnership with the Earth Research Institute at UCSB to set up the necessary infrastructure, generate appropriate label data, and disseminate that data for training computer vision models that can be used to monitor and map agricultural expansion and irrigated water use across southern Africa.

Member of the Environmental Leadership Incubator, 2020-2021 Cohort

October 2020 - June 2021

- Partnered with Santa Barbara Food Bank to construct an interactive map of potential future food distribution locations using poverty data from the Census Bureau in Tableau.
- Organized budget plans, grant proposals, and project plans.

EXTRACURRICULAR EXPERIENCE

Central Coast Data Science Fellow

September 2021 - Present

- Act as an ambassador of data science on campus to promote data science education.
- Learn about ethical data science through a collaborative, year-long capstone course.

Arnhold Undergraduate Environmental Science Fellow

June 2021 - Present

- Engage in research projects spanning land conservation and natural climate solutions while receiving mentorship from experts in the fields of environmental and ecological science.

SKILLS

Technical Skills: Proficient in Microsoft Office, Google Suite, JupyterHub, Tableau, R Studio, Python, ArcGIS, Github

Languages: Fluent in English and Mandarin
